This renewable energy training manual is an outcome of the European LEADER + Renewable Energy Network (ELREN) project. The key aims of the project are:

- Facilitating knowledge exchange among LEADER+ Local Action Groups throughout the EU with technical know-how, application experiences, basic commercial information and co-operation opportunities in the fields of Production of Energy from Renewable Sources (REprod) and of Energy Performance of Buildings (EnSav)
- Encouraging the application of micro-technologies in rural areas by local public institutions and agencies, SMEs and private households
- Disseminating basic information on Renewable Energy country policies, applicable legislation and available funding / incentives.

The key activities in this project are:

- Establishment of the ELREN Website and RE Projects Database
- Publishing of a RE Training Manual
- Organisation of field trips highlighting models of best practice
- Hosting project conferences to facilitate knowledge exchange among LEADER+ Local Action Groups throughout the EU

The ELREN Renewable Energy Training Manual is substantially based on the material and headings delivered by Tipperary Institute during a 30 hour "Introduction to Renewable Energy Training Course" completed in December 2005 for Carlow LEADER Rural Development Company Ltd. The content and scope of this manual has been informed by the nature and extent of that training course.

The country reports for Italy, the Netherlands and Spain (chapters 15-17) were written by Ecofys Netherlands BV. This work was co-ordinated Mr Max Rathmann. Individual authors are listed at the start of each chapter.

Material in chapter 11 (Liquid Biofuels) is edited from the SEI Briefing Note on Liquid Biofuels (2003) with the kind permission of Sustainable Energy Ireland. Additions and editing to the original text by Tipperary Institute.
