README.md	fix path typo	a year ago
gdal-installation-notes.md	Update Linux install instructions	a year ago

README.md

In deze repository vind je een selectie van interessante (landelijke) open geo datasets. Elke dataset is omgehuurd

De andere hacks vind je in de FarmHack organisatie: <https://github.com/FarmHackNL>

In de README van <https://github.com/FarmHackNL/Tijdhoudery> zie je hoe je de app kan bouwen voor Android en iOS.

De ontwikkelaar is [@Tobiaqs](#). Je kan hem via dit kanaal aanspreken of een prive Gitter kanaal openen.

Heya past and present FarmHackers, next week we are organising Mest Hack in Leeuwaarden in which we'll tackle the exciting world of... manure and its transport, application, governance and regulation. See <http://www.farmhack.nl/activiteiten/mesthack/> (in Dutch) for more information.

Check out the main FarmHack GitHub repo for a list of available data: <https://github.com/FarmHackNL/FarmHack#data> (in Dutch).

Finally, we've created a dedicated Gitter channel over here: https://gitter.im/FarmHackNL/mesthack?utm_source=share-link&utm_medium=link&utm_campaign=share-link

REWARDING NATURE HACK, 10 & 11 APRIL 2018

A group of seven people, mostly men, are standing outdoors in a rural setting. They are all wearing green overalls and dark boots. In the foreground, a small pink pig is standing on a muddy path. The background shows green trees and a fence. The overall scene suggests a farm or agricultural environment.
